PROFESSIONAL SUMMARY

Data and Business Analyst with 2.5+ years in logistics and manufacturing. Drives a ₹6Cr+ monthly P&L for Last Mile, leads an 8-member analytics team, and runs PMS for 1,500+ employees. Reduced CPO by 4% and voluntary attrition by 3pp via root cause analysis, forecasting, and BI dashboards in SQL, Advanced Excel, Looker, Tableau, and Power BI. Certified Data Analyst (IIT Kanpur-affiliated).

TECHNICAL SKILLS

Daily Drivers: SQL, Advanced Excel (Pivot Tables, VLOOKUP, Macros), Google Apps Script

BI & Visualization: Looker Studio, Tableau, Power BI, Apps Script Dashboards

Analytics & Ops: Budget & P&L Modeling, Incentive Design, Performance Management (PMS), Root Cause Analysis, Trend Forecasting, KPI Reporting, Workforce Modeling, BRD & SOP Authoring

Vibe Coding & Platforms: Claude Code, Cursor, Supabase, Railway, GitHub, SAP, Google Analytics, Gemini

Business & Soft Skills: Team Leadership (8 members), Stakeholder Management, Cross-functional Collaboration, Vendor Management

PROFESSIONAL EXPERIENCE

Assistant Manager — HR Analytics & Business Intelligence

Dec 2023 – Present

Shadowfax Technologies, Bengaluru

- **P&L Ownership:** Prepare and drive a ₹6Cr+ monthly P&L for Last Mile workforce spend, owning the full budget cycle from projection to monthly variance review across multiple regions.
- **Cost Optimization:** Implemented a Base + Flex workforce allocation model leveraging strategic data analysis, reducing Cost Per Order (CPO) from 1.02 to 0.98 across PAN India operations.
- **Incentive Design:** Designed and drove target-based performance incentives, holiday incentives, and peak-season incentives, lifting on-ground productivity and operational efficiency for the rider workforce.
- **Team Leadership:** Lead an 8-member analytics team — review cadence, mentorship, and ownership of dashboards, models, and stakeholder reporting.
- **Performance Management:** Run end-to-end PMS for 1,500+ employees from an analyst standpoint — goal-setting, review pipelines, and outcome tracking.
- **Predictive Analytics:** Performed 1.5-year root cause analysis and trend forecasting on attrition data, reducing voluntary attrition from 8% to 5% in the Bihar-Jharkhand region.
- **Financial Modeling:** Built and maintained Last Mile budget models, achieving less than 1% variance between projected and actual costs across multiple regions.
- **Dashboard Development:** Designed and managed PAN India Right-Sizing and Attrition dashboards in Looker Studio and Power BI, delivering real-time insights to senior leadership and enabling data-backed workforce decisions.
- **Product Analytics:** Drafted Business Requirement Documents (BRDs) for an in-house HRMS product; built and deployed a working prototype using Supabase (database) and Railway (hosting), accelerating delivery with AI-assisted development tools (Claude Code, Cursor).
- **Process & Stakeholder Management:** Authored SOPs to standardize productivity benchmarks; partnered with Operations, Finance, and HR teams; managed vendor partnerships to deliver workforce planning solutions at scale.

Graduate Apprenticeship Trainee

Mar 2022 – Mar 2023

Mazagon Dock Shipbuilders Limited, Mumbai

- **Quality Audits:** Inspected and audited Quality Management System (QMS) processes against defined service-line objectives, identifying non-conformances and supporting corrective action plans.
- **Data Reporting:** Conducted data analysis and generated inventory and consumption reports for the maintenance department's store section using SAP, supporting purchasing and stock-level decisions.
- **Operations Reporting:** Developed, released, and monitored daily production schedules; built recurring reports in Excel and PowerPoint to deliver KPI updates to department heads.

KEY PROJECTS

Headcount Right-Sizing Dashboard | *Looker Studio, SQL, Apps Script*

- **Built:** an end-to-end interactive dashboard tracking hub-level headcount and productivity, enabling operations leaders to make data-backed hiring decisions against defined productivity norms.
- **Standardized:** the off-roll hiring process by surfacing live productivity-versus-headcount views, replacing fragmented manual reports with a single source of truth.
- **Delivered:** a holistic view of productivity and headcount aligned to evolving business requirements, adopted across multiple operational hubs.

HRMS Product (In-House) | *Supabase, Railway, GitHub, Claude Code*

- **Leading:** the design and development of an in-house Human Resource Management System (HRMS) to digitize core workforce processes.
- **Authored:** the Business Requirement Document (BRD) defining user workflows, modules, and data flow across the full product lifecycle.
- **Built:** the full-stack application using Supabase (database & auth), Railway (hosting), GitHub (version control), and Claude Code for AI-assisted development.

CERTIFICATIONS

Data Analyst Certification — Edvancer & Eduventure (in collaboration with IIT Kanpur) May 2023 – Oct 2023
Coursework: SQL, Python, Tableau, Power BI, Advanced Excel, Statistics

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering Jul 2018 – Jul 2021
RGPV University, Indore • 78.7%

Advanced Diploma in Tool and Die Making Jun 2014 – Jun 2018
RGPV University, Indore • 71.1%
